From a computer: *By Email*

To send your images by email without losing quality, you can compress them into an archive.

1. Go to the folder containing your images

2. Select the image/s from the folder

3. Right click and choose "Send to" and "Compressed (zipped) folder from the menu and name the folder

4. Compose a new email message

5. Navigate to the location of the zipped folder containing the image/s on your hard drive. Double-click the zipped folder.

6. Send your email.

Using Dropbox

To send photos with Dropbox, you can create a shared link to the photos and send the link to recipients via email:

1. Log in to Dropbox

2. Click on create to create a shared Dropbox folder for your photos and upload the photos from your computer to the folder

3. Select the photos you want to share and drop into or upload to the Dropbox folder

4. Click Share and manage access, add the photo email address, then click on share folder

Recipients can view and download the photos without a Dropbox account.

Using WeTransfer

1. Go to wetransfer.com

2. click the blue plus icon and select the photos you want to send

3. Add a message for the recipient, then enter the photos email address – photos@schf.org.au in the Email To field and your email address in the Your Email field

4. Click Transfer. If you don't have an account, you'll need to verify your email address with a code sent by WeTransfer
